

WELL-FORMED DOCUMENT WORKFLOW

www.scribenet.com

Scribe's Well-Formed Document Workflow (WFDW) is the most efficient method for producing books and journals. Harnessing XML, the WFDW connects every stage of the publishing process, from manuscript preparation and editorial tasks to print and digital production.

Through the use of familiar programs such as Microsoft Word and Adobe InDesign alongside Scribe's proprietary tools and add-ins, the WFDW brings the power of XML into user-friendly publishing environments. The result is a streamlined pathway to error-free, accessible, cost-effective, future-proof publications.

What the WFDW Offers

- Scribe Add-In (SAI)
- InDesign Tools
- Digital Hub
- Scribe Markup Language (ScML)

Advantages of the WFDW

- Use of Familiar Programs
- Flexibility of Personnel and Production
- Sustainability
- Publications Always Accessible
